WELCOME TO THE 2024 EDITION OF THE REAL BULLS FOR REAL COWBOYS

Welcome to our 25th Anniversary Sale!

I don't think y2k will be a topic of conversation at this year's sale like it might have been in 1999, but it is good to be riding market highs again! Our industry has seen the highest highs and lowest lows over the last 25 years, and we have been fortunate to be at the forefront of it all as we have evolved with the times. Our customer retention over the last 25 years, and even before that, has been outstanding. It is reassuring to see the growth in our customers' herds as many of them, like us, have transformed from one generation of ranchers to the next. For us, the purebred industry shifted from one dominated by showrings to a market driven by the ability of our cattle to add dollars for each stakeholder in the beef value chain, culminating in one final performance once hung up. Our 10th Annual Cudlobe Influence Calf Sale, beef programs and the success of our commercial cow/calf customers as well as the feedlots who market Cudlobe influenced cattle across the globe is second to none. We are pleased to have been able to help others navigate this industry, and to have had the privilege of listening to and learning from each of you, our customers. We look forward to the future with our new and long-time customers, our sales management teams, and to growing and evolving with you all in this ever-changing industry.

Lastly, we hope you are as excited as we are about the 2024 sale offerings! We have a diverse set of bulls curated to meet your needs. While their pedigrees may differ, these bulls are the most consistent, and high quality we have ever produced thanks to tight breeding seasons, stringent phenotypic and genetic selection, and a highly functional maternal cow herd. We look forward to helping you meet your goals with your calf crop, and rebuilding the strongest, most valuable cow herd in Canada, to date.

Sincerely,

The Families of Cudlobe

WE ENCOURAGE EVERYONE TO COME LOOK AT THE BULLS AT THE FARMS BEFORE SALE

OBI LIVESTOCK LTD. WELCOME 2024

Welcome to the 25th Anniversary Bull Sale for the Bolduc Families!!! What an accomplishment. I have been searching through old files and came across this opening from my dad, Rob Holowaychuk, who was there and helped create the 1st Annual Cudlobe Bull Sale, Real Bulls For Real Cowboys. Here is a write up he did in a past opening remark.

"All the way from a planned program, to planned breeding decisions to sound management practices.... To no frills cowherd management.... To complete herd health practices.... To proper bull development.... To practical sale presentation.... To semen testing.... To bull delivery.... Followed up by superior breeder service. Furthermore the Bolduc's families have initiated for their customers, the Cudlobe Influence Feeder Sale. This through effort makes Cudlobe one of the highest committed seedstock sources in the land. Furthermore, the program has complete performance records, EPD's and 50K information. The strength of ultrasound carcass evaluation compliments the entire program. That is a lot to absorb but it is a lot of effort. One of the places to source bulls is at Cudlobe. More meaningful information than anywhere and besides that we have a great looking set of bulls. The best testament to any program is shown through the high percentage of repeat buyers. Cudlobe success is only possible if the customers are successful as well." Rob Holowaychuk. Thanks, dad for that write up, he always had a great way to put things.

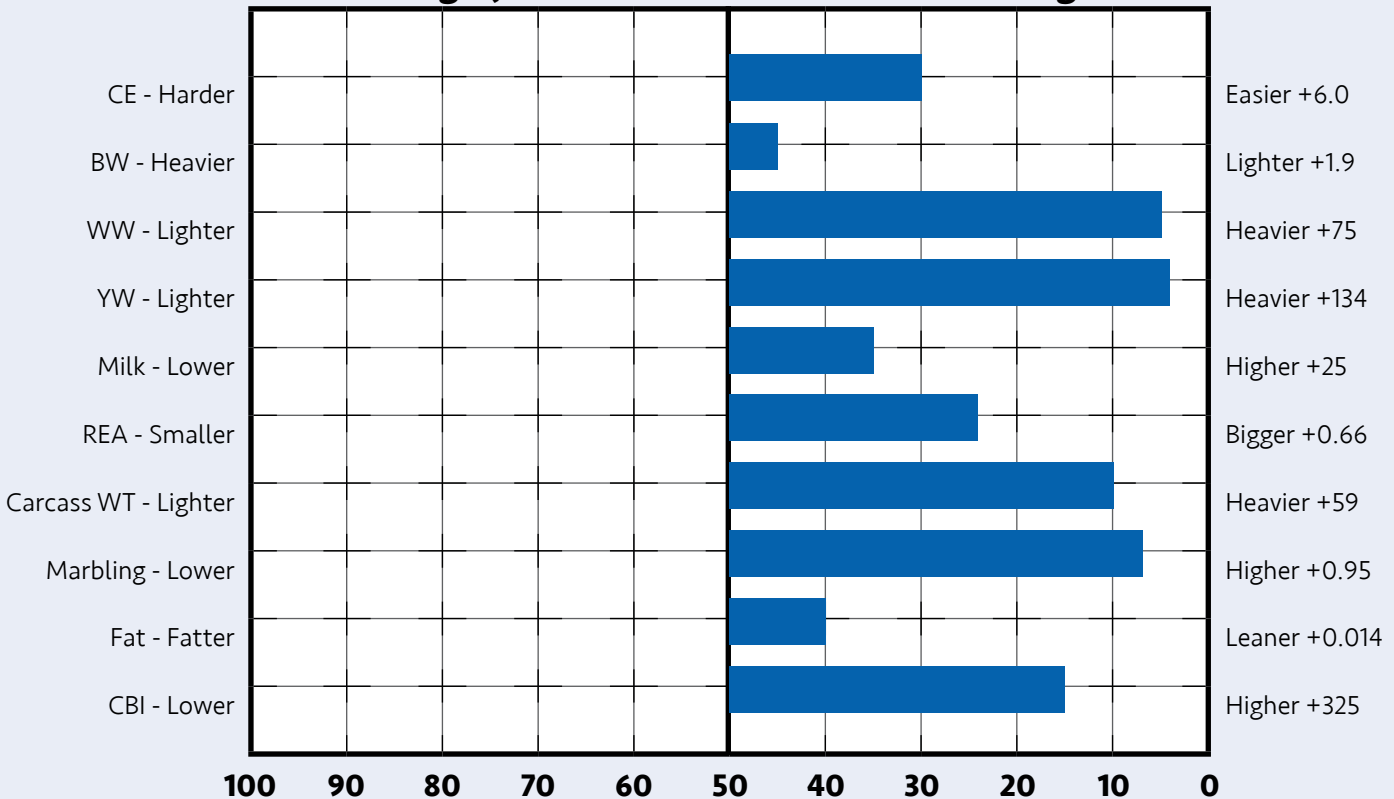

This year's offering is so uniform in the bull pens as you will see when you come analyze them. The summer tour hosted this year was another huge success with seeing the brood cows that these bulls selling are out of, what a powerful and uniform set of females. As usual hospitality was at its finest that day. Also, I attended the Cudlobe Influence Feeder Sale this past October and the customers that sold cattle day were walking away very satisfied. Huge congratulations to all involved.

What a time in the Beef Industry! It is a great time to develop your herd to the highest degree. The day may come when quality of product will be the best marketing tool you have. I am very proud to be working with the families of Cudlobe. OBI is here to help with your selections, purebred or commercial and will be at the farms the day before and day of the sale if you need assistance on the phone or helping you find your next herdbull.

See you Sale Day!
Mark Holowaychuk
OBI Livestock Ltd.

EPD Percentiles for 2024 Cudlobe Bulls

Average (Based on Fall 2024 EPDs Black Angus)

50th Percentile is the Breed Average EPDs for 2023 Born Calves

Each Individual Bull that Cudlobe Angus is selling today has its own graph. Go to www.cdnangus.ca and you can take a look at each of them.

Another Reason Why CUDLOBE BULLS are LEADING the Way in the Angus Industry

INTRODUCING

THE NEW CANADIAN ANGUS ASSOCIATION'S CANADIAN BALANCED INDEX

EPDs for new traits that are economically relevant are being developed and introduced to Canadian Angus members continuously.

Applying EPDs for all these traits into selection and breeding decisions can be challenging. Therefore, the Canadian Angus Association has worked to develop an Economic Selection Index that includes the EPDs for all traits. Traits are weighted in the index based on their economic impact on the Canadian commercial operation.

Basically, indexes help producers use EPDs to balance traits. Balancing traits can be complex. Not all traits make an equal contribution to profitability, and some traits counteract each other (e.g. post-weaning growth and cow size/feed requirements). Other traits are important to a certain threshold, then there is less benefit in going any further (e.g. calving ease) or even a direct cost (e.g. milk production).

A well-constructed index can help streamline the process of selecting cattle for breeding. It is not intended to replace individual trait EPDs (which will still be available) or to tell breeders how to breed. An index can help breeders focus on cattle that will tend to be more profitable under Canadian production systems and markets.

For the commercial producer—who likely purchases bulls and thinks about EPDs on only one day of the year—it is a useful overall guide that simplifies the complexity of multiple EPDs.

The Canadian Balanced Index will officially be launched later this year.

The index is expressed in terms of Canadian dollars and reflects the expected difference in profits between bulls' progeny.

For example:

Bull A CBI = \$250
Bull B CBI = \$150

On average, progeny from Bull A will be \$100 more profitable in a Canadian commercial operation than the progeny from Bull B.

If you have any questions about the new Canadian Angus Association Balanced Index please do not hesitate to contact CAA's Director of Science and Technology, Kajal Devani at kdevani@cdnangus.ca or 403-537-5604.

WHAT IS INCLUDED IN THE CANADIAN BALANCED INDEX:

GROWTH TRAITS

Birth Weight EPD
Weaning Weight EPD
Milk EPD
Yearling Weight EPD
Residual Daily Gain EPD

MATERNAL TRAITS

Calving Ease Direct EPD
Calving Ease Maternal EPD
Heifer Pregnancy EPD
Docility EPD
Mature Weight EPD
Foot Angle EPD
Foot Claw EPD

CARCASS TRAITS

Marbling EPD
Rib Eye Area EPD
Back Fat EPD

We were so impressed with the flush we did with Deer Valley Growth Fund X Cudlobe Enchantress 10F, that we kept an interest in 23J. Atlasta Angus bought this bull, and he sure has a lot of good calves as well at his farm. The name Growth Fund is so appropriate with these calves, moderate BW with explosive growth.

CUDLOBE W GROWTH FUND 26M

Now here is an excellent way to start the sale off. 26M is a top performance calf from a very solid made Mandate bred cow that crossed perfectly with Growth Fund 23J. He boasts a moderate BW of 85 lbs and an actual weaning weight of 924 lbs. This guy will add the pounds you want in the fall when you sell you calves.

They say the good ones always stand out and this guy is a prime example of this. This will be the first Justification son to sell in Canada and he is very worthy of this title. His raw numbers are 72 lbs Birth, actual weaning weight of 898 lbs (WW ratio of 118), and His EPD profile marks him as a herd builder. All this performance comes from a moderate framed Beast Mode 2 yr old that caught lots of eyes at the field day. In her pedigree you find lots of standout sires like Baldrige 38 Special and Cudlobe In Focus 5S. This calf has generations backing him up and has the look of front pasture herd bull. **Retaining 1/3 Semen Interest.**

This excellent Justification calf is another stand out heifer bull. Beautiful calving numbers combined with bigtime performance make this calf a very easy choice to bred lots of heifers too. From one of the first Upgrade daughters to calve this guy has a unique pedigree and checks all the boxes on paper and in person.

Three Rivers has always been a bull that will add lbs at weaning and this guy is potentially our best match up yet. 15M is a true cow bull that has more than enough power and style for any operation. Even with his large performance numbers he still comes with IMF in the top 15% and a REA in the top 1%. His mother is a fancy Legendary daughter that is carving herself a spot at the top of our cow herd. If you're on the hunt for some top end growth genetics, then this guy is your answer. **Retaining 1/3 Semen Interest.**

Now here is a good traveling calf with perfect feet under him. From a nice sized 10Z Mandate daughter this guy was made to breed cows and add lbs. Moderate 86 lbs actual BW will keep you happy at calving and even happier when you calves hit the scale next fall.

HERD HEALTH

Larrikin Veterinary Services is responsible for providing breeding soundness evaluations on Cudlobe Angus sale bulls and helps oversee the herd health program. The herd health program is focused on preventative medicine (vaccinations, nutrition, husbandry) which ensures the animals reach top production levels with optimal health and comfort. Bulls receive a modified live vaccine (Express® FP5-VL5 – Boehringer Ingelheim) which provides protection against Infectious Bovine Rhinotracheitis (IBR), Bovine Viral Diarrhea Virus (BVDV), Bovine Respiratory Syncytial Virus (BRSV), Parainfluenza 3 Virus (PI-3), Campylobacter fetus (Vibriosis) and Leptospirosis (Leptospira canicola, L. grippotyphosa, L. hardjo, L. icterohaemorrhagiae, and L. Pomona). They also receive a bacterin-toxoid vaccine (Ultrachoice® 8 - Zoetis) which provides protection against eight clostridial bacterial strains and a bacterin vaccine (Fusogard™ – Elanco) providing protection against Fusobacterium necrophorum.

56F has been a standout Rock daughter that has been a top performing cow from her first calf on. She is a Premier Dam with the CAA and has produced 4 grand daughters into our herd. This cow is big time female maker with all the carcass quality that you expect from a Rock bred female. Her first calf out of enhance scanned a whopping 12.5 (ratio 252) when we ultra-sounded our replacement heifers that year. When we decided to flush 56F we were looking for an outcross sire from our usual selections to use and the ever-popular Sitz Stellar fit that bill. Stellar has been well known for his performance and excellent foot score. These 2 bull calves were the only 2 males we got out of the flush (the other 7 are all females) and boy do they look the part. Big topped and excellent feet and legs underneath make these 2 herd bull prospects very easy to look at phenotypically. On paper they mark all the boxes and have that extra shot of carcass from 56F. If you're looking for bulls to build back better with pick these guys. **Retaining 1/3 Semen Interest on Lots 35 & 36.**

Sydgen Enhance was a mainstay for the Cudlobe program. He did such a good job we knew we had to incorporate a son to continue these genetics. 22H was the bull we liked out a tremendous mother, Delia 49E (Elite Dam). Bull Calves averaged 80 lbs and heifers 73 lbs. Phenotypical he leaves them very long and thick with excellent feet underneath. These calves are ranch proven and ready for work.

DB Iconic G95 is a moderate framed Musgrave Stunner bull with explosive performance and great muscle expression paired with an incredible EPD profile. His daughters are smooth made and feminine looking with good hip and leg structure. Previous year, high sellers came out of this group. These bulls always have extra middle to them and made so right.

Ellingson Three Rivers 8062 is the power bull we were looking for. Huge WW and YW numbers in this sire group. You want power and performance with great Marbling, look no further. The bulls last year were very well accepted. Same type here, loads of capacity with explosive numbers. 18 Sons Selling this year.

A bull that Semex owns with Stevenson Angus Ranch. Justification is a physically impressive sire that combines legitimate body capacity, stoutness and foot quality. Sired by the great KG Justified and from a long line of Abigail females. Justification has the genetic consistency to sire quality progeny in all aspects. Great Calving Ease Numbers with Explosive growth with very good Marbling and REA. New sire group with 8 bulls selling.

One of the top Marbling scores EPD sires available from ORigen, Baldrige Versatile is the highest marbling animal ever produced in the Baldrige Performance Angus program and he sold to a progressive group of Angus breeders for \$250,000. Second year we have Versatile bulls in the sale and last year's group were one of the high selling groups.

We were so impressed with the flush we did with Deer Valley Growth Fund X Cudlobe Enchantress 10F, that we kept an interest in 23J. Atlasta Angus bought this bull, and he sure has a lot of good calves as well at his farm. The name Growth Fund is so appropriate with these calves, moderate BW with explosive growth.

Excellent heifer bull here from an Iconic son we cleaned our heifers up with. This guy is from a 1st calf Ridge heifer that is shaping into an excellent cow. Low birth weight calf here that will do lots to add performance and carcass merit to your calf crop.

Another great calf off a 1st calf heifer here again. 8K is a big deep heifer out of Limestone so this calf should be a nice fit on any operation to add some power and carcass. Out of Versatile too so you know he'll be good calving.

Another bull we used to walk the pastures at Cudlobe West. He averaged 83 lbs on his bull calves here. We incorporated GB Fireball 672 into our program and really liked the rib shape, rump and overall doability on his progeny. His Dam Delia 14G is an Enhance daughter as well.

What a year it has been in the beef business! We want to extend our heartfelt thanks to all our beef customers, near and far, who have supported our small family side hustle. It has always been our dream to provide high-quality beef to our surrounding communities for everyone to enjoy.

With the addition of the Certified Angus Beef Ranch to Table logo, we can confidently guarantee that our beef is of the highest quality. This commitment is reflected in our impressive results: 50% of the 75 head processed in 2024 have graded Prime, and 98% have met the ten Certified Angus Beef qualifications for the Ranch to Table Program.

This data is particularly encouraging, as it indicates that our cattle are spending fewer days on feed to achieve their optimum grading potential—thanks to their genetics and our focus on carcass traits, which enhance meat quality.

We are excited to see what the future holds for our little side hustle and look forward to continuing to supply our local communities with top-quality products. Shop with us at www.cudlobe.com!

Cudlobe 25th Anniversary Testimonials

On behalf of Niznik Ranches, we would like to congratulate the Cudlobe Families on their 25th Annual Bull Sale. The quality of cattle and incredible customer service continue to make them the best in the breed. The Bolduc's have become more like family than business associates, and we look forward to many more years working with them.

Bruce Niznik

25 years of taking chances, of trusting their gut, and stepping into unknown waters has led Cudlobe Angus and the Bolduc family to becoming knowledgeable, innovative, trend setting leaders of both the Angus breed and the beef industry as a whole. Bolduc's dedication to constantly improving their herd is remarkable. The same dedication has been given to customer satisfaction. Great bulls, raised to last, with trend setting EPD's by people who truly listen to their customers' concerns and needs. Betty and Glenn have spent 60+ years dedicated to improving their commercial cattle. "Each year your calves should be the best you have ever raised" is their mindset. Cudlobe bulls have played a big role in reaching our goals year after year. A third generation of Wideman's are now actively participating in our bull buying decisions. The little boys who were plying Dyce for knowledge and his opinion while comparing notes with Kaitlynn at field days, have grown into the next generation of serious bull buyers. Congratulations to our friends at Cudlobe for 25 successful years. Here's to many more years of better bulls and continuing friendships.

The Wideman Family, Mapiatow Ranch Ltd

We have been customers of Cudlobe Angus since before they started their Bull Sale and we have found Cudlobe Angus bulls to be structurally sound and eye appealing on the outside, with the data to prove what you are getting on the inside. They are always trying to be one step ahead of the industry and always looking to improve their genetics to help the commercial breeder improve their own herds. The Cudlobe Influence calf sale has also exposed our steers to different buyers and markets which has resulted in premiums paid for in the calves. Dyce, David and the families are leaders in the Purebred Black Angus Industry and will always be looking to see how they can improve their Angus cattle for the customer. Thank you to the Bolduc families for all you do.

The Giles Family

Bolduc's; Congratulations on your 25th Annual Year!

Our Family has been buying bulls for over 20 years (Harbinson Ranches/Farms).

Over the years, Cudlobe have not only produced and supplied quality bulls, but they have also set the bar! This has made our program stronger over the years, which in turn has made the quality of our herd that much better as well.

Cudlobe are not only an asset to the cattle industry but believe in lasting relationships.

That goes without saying when it comes to our family!! Congratulations again, all the best in the future years!

Harbinson Family

Cudlobe and the Bolduc family have been an integral part Of Cross Cattle Co. since 1986. Their dedication to building a structurally sound performance driven herd that gives us great cows and yearlings that are sale toppers every year is the foundation of our generational relationship. We are happy to celebrate 25 year and hundreds of bulls purchased with Cudlobe. Cudlobe is always willing to give a hand whether it's at weaning, branding or giving advice; its a true testament to who they are.

Cross Cattle Co.

Congratulations to Cudlobe Angus on 25 years of bull sales! These families are committed to providing top quality Angus genetics to the Canadian cattle industry. Their commitment to ensuring that they provide high-performing, sound, quality bulls is a top priority for the Bolduc's. They are progressive in developing industry leading programs that enable them to maintain the highest of standards and quality in the Angus world. It's been privileged to watch the next generations grow and develop and implement their own programs. The Cudlobe families have been extremely generous with their support in the community, as well as the cattle industry, spending time on numerous boards and sponsoring numerous events; too many to list. I've been privileged to be part of the genetically influenced calf sale, the replacement quality heifer's sale, as well as the bull sale for the last 19 years. On behalf of all of us at Foothills Auctioneers in Stavely, thank you!

Wishing you all the very best and congratulations on this amazing milestone.

Rob Bergevin, Foothills Auctioneers

Cudlobe Field Day 2024

Genomic Percentile Ranks

Definition of Traits

Calving Ease Direct (CED)

Is an indicator of an animal's genetic potential for unassisted births in first-calf heifers. Animals in the top 20th percentile of the breed indicate more direct calf calving ease than animals in the bottom 80th percentile.

Mature Height (MH)

Characterizes the genetic potential for mature cow height at six years of age. Animals in the top 20th percentile of the breed indicate larger cow size in frame or hip height than animals in the bottom 80th percentile.

Heifer Pregnancy Rate (HP)

Is used as a tool to increase the chance of a sire's daughters becoming pregnant during a normal breeding season. Animals in the top 20th percentile of the breed indicate more probability of daughters becoming pregnant at first exposure than animals in the bottom 80th percentile.

Birth Weight (BW)

Measures genetic potential for calf weight at birth. Animals in the top 20th percentile of the breed indicate lighter birth weight calves than animals in the bottom 80th percentile.

Calving Ease Maternal (CEM)

Characterizes an animal's potential for unassisted births in first-calf daughters. Animals in the top 20th percentile of the breed indicate fewer assisted births in first calf heifers than animals in the bottom 80th percentile.

Carcass Weight (CW)

Is a genetic predictor of hot carcass weight as measured at harvest time. Animals in the top 20th percentile of the breed indicate more pounds expressed than animals in the bottom 80th percentile.

Weaning Weight (WW)

Is a measure of genetic potential for calf weight at weaning. Animals in the top 20th percentile of the breed indicate more pounds of weaning growth than animals in the bottom 80th percentile.

Milk (MILK)

Is a measure of milk and mothering ability as expressed in daughters. Animals in the top 20th percentile of the breed indicate more pounds of weaning weight in calves through the dam's milking and maternal ability than animals in the bottom 80th percentile.

Fat Thickness (FAT)

Is a predictor of the differences in external fat thickness as measured between the 12th and 13th carcass ribs. Animals in the top 20th percentile of the breed indicate less back fat cover than animals in the bottom 80th percentile.

Yearling Weight (YW)

Describes an animal's potential for calf weight at one year of age. Animals in the top 20th percentile of the breed indicate more pounds of post weaning growth than animals in the bottom 80th percentile.

Scrotal Circumference (SC)

Is a measure of genetic potential for scrotal circumference, a predictor of bull fertility. Animals in the top 20th percentile of the breed indicate more yearling scrotal size than animals in the bottom 80th percentile.

Ribeye Area (REA)

Characterizes an animal's genetic potential for ribeye area. Animals in the top 20th percentile of the breed indicate more ribeye area than animals in the bottom 80th percentile.

Yearling Height (YH)

Characterizes an animal's genetic potential for height or frame. Animals in the top 20th percentile of the breed indicate larger frame size than animals in the bottom 80th percentile.

Docility (DOC)

Is an animal's genetic potential to be extremely calm, or to have calm offspring. Animals in the top 20th percentile of the breed indicate more docile animals than animals in the bottom 80th percentile.

Marbling (MARB)

Is an expression of the potential to improve marbling score, which is used to predict Quality Grade in beef cattle. Animals in the top 20th percentile of the breed indicate more marbling and greater potential to grade AAA than animals in the bottom 80th percentile.

Mature Weight (MW)

Is an expression of genetic potential for mature cow weight at six years of age. Animals in the top 20th percentile of the breed indicate larger cow size in pounds than animals in the bottom 80th percentile.

Tenderness (TND)

Represents the genetic potential for tenderness as measured by the Warner Bratzler shear force test. Animals in the top 20th percentile of the breed indicate more tenderness than animals in the bottom 80th percentile.

CUDLOBE INFLUENCE

Feeder Sale 2024

Monday October 7, 2024 marked a very
special day in the Beef Business for

CUDLOBE ANGUS

and some of their customers.

2024 was the 11th anniversary of the Cudlobe influence feeder calf Sale. The criteria to be part of the sale is that 50% of the calves must be Cudlobe Angus sired. This year there were 2500 calves featured in the sale from Sheppard Creek Ranch, Matt and Addie Bolduc - Cudlobe West Niznik Ranches, Torkelson Farms, Roy & Karen Hall, Curtis, Heather, Jamie and Stephanie Harbinson and the Giles Ranch. Sale took place October 7 as it has been in the chosen date for the last few years selling the first week of October. Over the last five years, there has been an increasing desire for these genetically influenced calves, which is evident in the repeat customers coming back to purchase year after year. Responses from buyers have been extremely valuable in them sharing that these calves are healthy and perform extremely well on feed. The calves have been showing a premium between \$.05 and \$.10. Based on can fax averages that week consistently over the last number of years. The commitment of these ranchers to continue to participate in the sale is amazing and it's an absolute privilege to be part of it. This is the longest running genetically influenced sale in North America. The quality of these calves is apparent. Due to the repeat customers competing for them year after year. This group of ranchers is dedicated and committed to delivering the best of the best to the buyers. These are a tight group of individuals sharing a common goal, of providing this high quality well performing Calves. As we look to the future, we know the margins are thin in this industry, so it becomes increasingly more important to purchase quality cattle that perform. On behalf of all of us at Foothills Auctioneers, it's a privilege and an honour to work with Cudlobe Angus and the producers that raise these amazing cattle, and we look forward to much more continued success. **Rob Bergevin**

Congrats to our Customers!!

- Roy & Karen Hall
- The Niznik Family
- The Giles Family
- Curtis, Heather, Jayme & Stephanie Harbinson
- Torkelson Farms
- Shepard Creek Cattle Co.
- Cudlobe West - Mat & Addie Bolduc

There are a few that who have marketed their cattle successfully as Cudlobe Influenced that we would like to acknowledge including:

- Cross Cattle Compnay
- Duckworth Ranches
- Schneider Ranches
